

Density Column Extra Credit

Find instructions for how to create a density column from the internet. Steve Spangler has an excellent set of instructions with pictures.

<http://www.stevespanglerscience.com/experiment/seven-layer-density-column>

You must bring in the following in order to get credit:

1. A picture of you with your density column (you may email this in).
2. A diagram of your column with each layer labeled and colored.

You may bring in your column as well, but it could get mixed up if it gets jostled. You will earn 1 point per layer, with a minimum of 3 layers and a maximum of 10. Most density column instructions have instructions for 7 liquids. Be careful when handling the household products and be sure to have adult supervision.

Due by September 23rd!
